

Bethlehem Christian School Technology

More and more, we are living in a digital world. Our staff uses technology everyday in their classrooms creating lesson plans, doing research and communicating vital information to parents about their student's progress.

We recognize the necessity of interfacing with our world using technology. Our students adapt to technology at warp speeds. Have you ever noticed how quickly your child learns a new video game or how they can show you how to use features on your phone without reading the manual? Keeping that in mind, our technology plan provides students with the resources they need to utilize technology in their academic pursuit.

To experience how our faculty and staff are using technology, log in to our school website at:

www.bethlehemchristianschool.org

From our Home Page we invite you to visit the BCS Video Showcase:

Student Produced Video
Campus Life
Classroom Activities

Our classrooms are equipped with interactive whiteboards, mini-mac computers, digital document cameras and Bose audio to enhance the learning experience for teachers and students. Laptop computers are also available in the classroom to extend the learning experience for our students.
