### From My Heart...

Ladybugs are tiny, but they serve an important role in the cycle of nature. God wants you to know that—just like the ladybug—that thing you do, no matter how small the task might seem, **is making a difference in the life of someone.** Your work has eternal effects, and it's important, no matter how tiny you might feel in this big world.

With Ladybug Women's Ministries, we work to encourage you by sharing the stories of powerful women from the Bible. When women begin to know the stories of the powerful leaders that the Bible talks about, who took bold steps that weren't necessarily "proper" in their time, they become empowered and begin to believe what I know God wants them to realize—that **they can be world changers.** You can rise above circumstances, things that are working against you, and you can contribute to history just like women in the Bible did. God desires that for your life. **He created you to be powerful.** The Bible says that you are fearfully and wonderfully made and God's Word ensures us that wherever you're at today, **He sees you.** He sees what's going on in your world, and **He loves you. He has a dream for your life.**

In addition to serving in several leadership roles, Lori Hartin currently provides pastoral care to a Sacramento region business networking group. Mother of three sons, Lori and her husband, William, have been raising a blended family for 18 years. An ordained minister, Lori founded Ladybug Women's Ministries to encourage, equip and empower women everywhere.
