

GOT CIRCULATION?

THURSDAY, APRIL 19

8AM - 3PM

VALPARAISO HEALTH CENTER
3800 ST. MARY DRIVE • MAIN ENTRANCE
VALPARAISO

St. Mary Medical Center's L.I.V.E. Comprehensive Vascular Screening may help identify possible risks for stroke or heart attack even before symptoms occur.

\$60*

**Payment due at time of service.
Insurance will not be billed.
Screening includes consultation
with Felix Gozo, MD, medical
director of Cardiopulmonary
Rehabilitation at
St. Mary Medical Center.*

Your vascular screening includes:

- 1. Stroke/Carotid Artery Screening** - ultrasound of the carotid arteries to screen for blockages or plaque build-up, a leading cause of stroke.
- 2. Abdominal Aortic Aneurysm (AAA) Screening** - ultrasound of the abdominal aorta to screen for the presence of an aneurysm.
- 3. Peripheral Artery Disease (PAD) Screening** - doppler ultrasound of the arteries that supply the legs to screen for blockages or plaque build-up.
- 4. Venous Screening** - physical assessment of the lower legs to screen for circulation issues caused by damaged or diseased veins.
- 5. Heart Rhythm Screening** - cardiac rhythm strip using EKG electrodes to screen for abnormal heart rhythms.

**Appointments are limited.
Call 219-836-3477 or 866-836-3477.**

**L.I.V.E.**
