Honduras New Hope Clinic Jan., Feb., 2015 Weekly Reports

Weekly Report Jan. 5-9, 2015

This week we saw a total of 90 patients, 34 of whom were unable to pay because of limited financial resources.

This week we took care of an emergency of a patient for head machete wounds. The patient is 20 years old and was working in the fields (cutting tomatoes) when a man with a machete suddenly appeared and without speaking gave him two wounds on his head that were the largest and another on his shoulder. The aggression was caused by problems of passion. The aggressor was under the influence of alcohol and when he got ready to kill his victim he realized that he was the wrong person. At that point the aggressor fled. When the patient entered the clinic he was in very bad condition because of the abundant blood loss. We quickly put him on intravenous liquids to avoid shock and then when his vital signs improved we began to repair his wounds. His family are very grateful to the clinic because if they had taken him anywhere else the patient would have died. The patient is now recovering very well and the aggressor turned himself into the police a week after the incident.

I gave an educational talk and organized a cleanup operation in the community of Rio Arriba.

1 patient with machete wounds
4 patients with gastroenteritis
1 patient with signs and symptoms of CRUP
1 patient with signs and symptoms of senile dementia
3 patients with grade I sprain
2 patients with common warts
2 patients with signs and symptoms of urinary infection
1 patient with chickenpox
1 patient with facial paralysis
1 patient with seborrheic dermatitis
2 patients with anemia as shown by lab test
2 patients with bacterial conjunctivitis
2 patients with elevated uric acid
2 patients for control of insufficient venous
1 patient with mastitis on the right breast
1 patient with acute diarrhea syndrome
4 patients recalled for Pap smear results and treatment
5 patients with common colds
2 patients with depression syndrome
1 patient for control of ulcer on leg because of insufficient venous
2 patients with rhinitis
2 patients with menstrual pains
2 cases of labial herpes
2 patients for pregnancy tests
1 patient with erectile dysfunction
4 patients for family planning
2 patients with viral throat infections
2 patients for catheter changes
3 patients for minor surgery
1 patient with inner ear infection
2 patients with hemorrhoids
1 patient for wound cleaning
2 patients with allergic dermatitis
1 patient with gonorrhea
1 patient with hepatomegaly
2 patients with grade II varicose veins
2 patients with post menopause syndrome
3 pre-natal visits
2 Pap smears
7 patients for diabetes control
5 patients for hypertension control
1 patient with fatty liver

Dental Report

This week I saw a total of 38 patients, 10 of whom were unable to pay because of limited financial resources.

Extractions
Prophylaxis

Surgery

This week we saw a total of 94 patients, 36 of whom were unable to pay because of limited financial resources.
This week was the rabies vaccination campaign in the entire country to avoid the rabies virus. The campaign was massive in the entire region of Orica. We personally cooperated with this campaign and vaccinated about 250 dogs in two days. We coordinated this campaign together with the personnel in the health Center in Orica. The campaign was a success and an increased number of dogs were vaccinated.
This week I organized a cleanup operation in the community of Guatemala and gave a talk of changes during adolescence.

1 patient with failing diabetes
2 patients with cataracts in the left eye
2 patients with torticollis
2 patients with bronchial hyperactivity
1 patient with depression syndrome
2 patients with vaginal Gardnerella
2 patients with delayed menstruation because of pregnancy
1 patient for repositioning of IUD
2 patients diagnosed with shingles
1 patient for control after treatment for Helicobacter pylori
2 patients with seborrheic dermatitis
1 patient with signs and symptoms of rheumatic fever
2 patients with halitosis
1 patient with a foreign object in the right eye
8 common colds
1 patient with chickenpox
2 patients with bronchitis
2 patients for minor surgery
3 patients with allergic dermatitis
1 patient with solar dermatitis
1 patient with melasma on the face
2 patients with infected wounds
3 case of control for bronchial asthma
1 patient for suture removal
1 patient with nasal hemorrhage
4 patients recalled for Pap smear results and treatment
2 patients for catheter change
2 patients for control of elevated uric acid
2 patients with sinusitis
1 patient with erysipelas
1 patient with head lice
2 cases of control for gastritis
2 patients with slight anemia as shown by lab tests
2 patients for control of irritable colon problems
1 patient for cleaning of chronic ulcer of the right leg
1 patient with dental abscess
1 patient with throat infection
2 patients with inner ear infections
1 patient with diarrhea syndrome and moderate dehydration
3 prenatal visits
3 Pap smears
2 patients with vaginal trichomoniasis
4 patients for control of hypertension
3 patients for control of diabetes
3 patients for control of probable arthritis
1 case of alopecia areata
2 patients with urinary infections
1 patient with venous circulation problems
1 patient with high cholesterol and triglycerides

Dental Report

This week I saw a total of 43 patients, 15 of whom were unable to pay because of limited financial resources.

Extractions 40
Prophylaxis 4
Root Canals 2
Weekly Report Jan. 19-23, 205

This week we saw a total of 100 patients, 37 of whom were unable to pay because of limited financial resources.

This week a woman visited us who had had a Pap smear done at the clinic and was coming to receive her result from the smear. Unfortunately the result was not good and showed Stage III cervical cancer. The patient could not believe it and began to cry. I tried to console her and told her we would do everything possible to help her with her treatment because this person is very poor and has no economic resources to follow through with the treatment.

I spoke with the Director of the Cancer Center in Tegucigalpa and explained the case to her. This Center accepted our request and offered her free treatment. The patient only had to pay an almost symbolic payment for the administrative documents. The woman is in treatment having recovered the strength and hope to continue fighting for her life after feeling she was in a dead end situation. And she is very grateful to the clinic for the spiritual and economic aid that we gave her.

This Friday I gave a talk on adolescence and its complications in the community of Santa Cruz.

1 patient with Stage III cervical cancer
1 patient with abdominal hernia
1 patient with multiple lacerations from a fall from a ladder
2 patients with light pneumonia
1 patient with vitiligo
2 patients with chickenpox
3 patients with gastroenteritis
2 patients with menstrual pain
1 patient with ovarian cysts
3 patients for pregnancy tests
1 patient with vaginal infection, probably Gardnerella
4 patients with urinary infections
2 patients with adenopathy of probable viral origin
1 patient with acne problem
2 patients with throat infections
1 patient with allergic conjunctivitis
6 common colds
2 patients with signs and symptoms of heatstroke
2 patients with bronchitis
2 patients for minor surgery
4 patients with allergic dermatitis
1 patient for control of solar dermatitis
3 cases of control for bronchial asthma
1 patient for suture removal
1 patient with seborrheic dermatitis
2 patients with Lumbago
3 patients recalled for Pap smear results and treatment
2 patients with ring worm
2 patients for catheter changes
1 patient with elevated uric acid
2 patients for extraction of lipomas
2 patients with sinusitis
1 patient with erysipelas
4 cases of gastritis
2 patients for control of anemia
4 patients for control of irritable colon problems
2 patients for ulcers on legs cause by insufficient venous
1 patient for ear irrigation
2 patients with Guardia lambia as shown by lab exam
3 prenatal visits
4 Pap smears
4 patients for hypertension control
5 patients for diabetes control
1 patient with bullous impetigo
2 patients with probable arthritis

Dental Report

This week I saw 45 patients, 14 of whom were unable to pay because of limited financial resources.

Extractions 20
Prophylaxis 2
Root Canals 3
Fillings 49
Surgery 1

This week we saw a total of 88 patients, 30 of whom were unable to pay because of limited financial resources.
This week we took care of a three member family emergency that were overturned in their car when the driver lost control of the automobile. The car turned over several times on falling into a ravine. The mother had a fracture of the right forearm. The five year old boy had a broken nose and a wound on the forehead. The father received a blow on the left ribcage. On examining the father in the clinic he had a more serious lesion and apparently a fractured rib that caused an interior lesion for which we stabilized him and sent them to Tegucigalpa. The mother and child were released but the father was operated on immediately as an emergency because he apparently had a ruptured spleen. The patient spent almost a month in the hospital after the operation and is now recuperating well.
This Friday I organized a cleanup operation in the community of Encino and gave a talk on First Aid.
3 patients with multiple traumas
1 patient with Grade I sprain
1 patient with ringworm
2 patients with head lice
2 patients with roundworms
3 patients with gastroenteritis
2 patients with menstrual pains
2 patients for pregnancy test
3 patients with vaginal infections, probably Gardnerella
2 patients with halitosis
1 patient with pinworm problems
2 patients with gingivitis
2 patients with allergic conjunctivitis
5 common colds
1 patient with bronchitis
1 patient for minor surgery
2 patients with allergic dermatitis
1 patient with Grade I burns
1 patient for control of seborrheic dermatitis
2 patients recalled for Pap smear results and treatment
2 patients for catheter change
2 patients with elevated cholesterol and triglycerides
1 patient with grade II varicose veins
3 patients for control of irritable colon problems
1 patient for infected wound cleaning
2 patients with hemorrhoids
2 patients for ear irrigation
2 patients with throat infection
2 patients with osteocondritis
2 patients with diarrhea syndrome and moderate dehydration
3 Pap smears
2 patients for replacement of IUD
7 patients for control of hypertension
8 patients for diabetes control
4 patients for family planning
2 patients with urinary infections
2 patients for depression syndrome

Dental Report

This week I saw 46 patients, 13 of whom were unable to pay because of limited financial resources.

Weekly Report Feb. 2-6, 2015

This week Dr. Flores took care of 80 patients, 30 of whom were unable to pay because of limited financial resources. Dr. Flores covered the clinic while Dr. Davila was in the Tampa Bay area.

This week I took care of a little boy who had accidentally ingested kerosene. This combustible liquid was in a juice bottle which the child took by accident thinking it contained juice. Upon drinking the liquid, the child began to vomit and was a little disoriented and with the obvious smell of having taken kerosene. He was sent to the Hospital Escuela in Tegucigalpa where he was admitted to the pediatric ward. He was released after a week there.

1 patient with kerosene intoxication
2 patients with post menopause syndrome
3 patients with probable arthritis
2 patients with oral candidiasis
3 patients for pregnancy tests
4 patients for prenatal visits
3 patients with probable acne
2 patients with usurelo
4 common colds
2 patients with bronchitis
2 patients for minor surgery
3 patients with allergic dermatitis
1 patient with solar dermatitis
2 cases of control for bronchial asthma
3 patients recalled for Pap smear results and treatment
1 patient for catheter change
2 patients with sinusitis
1 patient with erysipelas
1 patient with hives
3 cases of gastritis
3 patients with light anemia as shown by lab results
2 patients with infected dental cavities
2 patients for ear irrigation
2 patients with inner ear infections
3 patients for family planning
3 Pap smears
2 patients with diaper rash
6 patients for hypertension control
5 patients for diabetes control
2 patient with toenail fungus
3 patients with urinary infections
2 patients with athlete’s foot
2 patients with venous circulation problems
3 patients with high cholesterol and triglycerides
2 patients with muscle spasm problems
Dental Report

This week I saw a total of 47 patients, 17 of whom were unable to pay because of limited financial resources.

This week we saw a total of 81 patients, 29 of whom were unable to pay because of limited financial resources.

This week I took care of a 50 year old woman with intense colonic pain in the area where the biliary gallbladder is located. The pain was so intense that I administered intravenous analgesics. The patient was sent to Tegucigalpa where she was operated on as an emergency which showed an impacted gall stone that had caused the intense pain. She is now in very good health.

1 patient with gall stones
1 patient with colonic type renal stones pain
1 patient with nasal polyps
1 patient for chemical conjunctivitis
2 patients for insufficient venous
2 patients with grade I burns
1 patient with perforated tympanic membrane
1 patient for suture removal
2 patients with hyperactive bronchial
8 common colds
2 patients with bronchitis
1 patient with erysipelas
1 patient with menstrual pain
2 cases of bronchial asthma
1 patient with seborrheic dermatitis
2 patients with toenail fungus
4 patients recalled for Pap smear results and treatment
1 patient for catheter change
1 patients with sinusitis
2 patients for minor surgery
4 cases of gastroenteritis
2 patients with throat infections, probably viral
3 patients with irritable colon problems
1 patient for wound cleaning
2 patients with allergic dermatitis
3 patients for family planning
2 patients with elevated uric acid
2 patients with urinary infections
1 patient for a scorpion sting
1 patient for moderated dehydration because of vomiting
3 prenatal visits
2 Pap smears
2 patients with rheumatoid arthritis
4 patients for hypertension control
3 patients for diabetes control
3 patients with intestinal parasites
1 patient with Pterygium
1 patient with allergic rhinitis
1 patient with depression syndrome
2 patients with muscle spasms

Weekly Report Feb. 16-20, 2015

This week we saw a total of 83 patients, 36 of whom were unable to pay because of limited financial resources.
This week I took care of a 6 year old girl with suspected hemorrhagic dengue fever. We sent the patient to Tegucigalpa as an emergency so they could do a clinical analysis and receive better attention. Thanks to the Lord the analysis showed that we were dealing with classic dengue and the patient is recuperating well in her home.

1 patient with a dislocated left shoulder
2 patients with menstrual pain
3 patients with muscle fatigue pain
1 patient for condyloma
1 patient for replacement of IUD
2 patients with acne problems
4 common colds
1 patient with asthma crisis
2 patients with bronchitis
2 patients for minor surgery
2 patients for suture removal
3 patients for wound cleaning
2 patients with allergic dermatitis
1 patient with solar dermatitis
2 patients with seborrheic dermatitis
2 patients for family planning
3 patients for Pap smear results and treatment
3 patients with sinusitis
1 patient with erysipelas
2 patients with shingles
2 cases of gastritis control
2 patients with light anemia as shown by lab results
3 patients for control of irritable colon problems
1 patient with Grade II varicose veins
1 patient with dental abscess
3 patients for ear irrigation
2 patient with inner ear infections
1 patient with diarrhea syndrome and moderate dehydration
3 patients for gastroenteritis
7 patients for hypertension control
8 patients for diabetes control
3 patients for probable arthritis control
2 patients with urinary infections
1 patient with venous circulation problems
3 patients with high cholesterol and triglycerides
1 patient with depression syndrome

Dental Report

This week I saw a total of 26 patients, 9 of whom were unable to pay because of limited financial resources.

Extractions 17
Root Canal 2
Fillings 17

This week we saw a total of 80 patients, 28 of whom were unable to pay because of limited financial resources.
This week I took care of an emergency patient who had a bloody vomit. She also said that her feces were black. She had a history of gastritis and when the patient arrived her blood pressure was low because of the abundant bloody vomiting. We stabilized her and then sent her to Tegucigalpa to the gastroenterology ward where they admitted her and did an endoscopy procedure in which they observed that the cause of the bleeding was a gastric ulcer. The patient was released and is coming to the clinic with appointments for her control and treatment.
1 patient for suspicion of light pneumonia
2 patients with intestinal parasites as shown by lab results
3 patients with gastroenteritis
2 patients with diarrhea syndrome and moderate dehydration
2 patients with suspected diabetes
2 patients with suspected myopia
2 patients with grade II varicose veins
1 patient with stomatitis
3 patients with acne problems
2 patients for suture removal
2 patients with protein calorie malnutrition
8 common colds
2 patients with bullous impetigo
1 patient with hives
5 patients recalled for Pap smear results and treatment
2 patients with athlete's foot
2 patients with sinusitis
2 patients with throat infections
3 patients with irritable colon problems
1 patient for wound cleaning
2 patients with allergic dermatitis
2 patients for nervous crisis
2 patients with versicolored worms
2 patients with Pterygium
4 prenatal visits
3 Pap smears
6 Patient for hypertension control
7 patients for diabetes control
2 patients with torticollis
2 patients with sciatic nerve neuralgia

Dental Report

This week I saw a total of 35 patients, 8 of whom were unable to pay because of limited financial resources.
